

Previous Trips with Sea Hunt Scuba

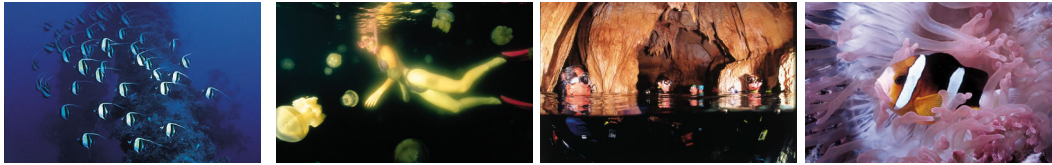

Here are a few of the trips we have taken previously as part of our vacation dives program:

Bahamas

Visited 1994, 1995, 1996, 1998, 1999, 2002, 2005 and so on.

The Bahamas are located only 60 to 100 miles east of South Florida. Sea Hunt Scuba visits this area every few years. Nassau, Port Lucayca, Free Port, & Bimini are a few we dive regularly. The Islands of The Bahamas offer an array of dive experiences like no other destination in the world. There are sunken Spanish galleons, inland blue holes, caves and forest-like coral reefs, all teeming with marine life.

Palau

Visited 1994 & 2002

The Republic of Palau of Micronesia is 900 miles southwest of Guam in the Eastern Pacific Ocean. Palau's mushroom-shaped rock islands offer a variety of exciting dives: WWII wrecks, shark-infested channels, blue holes, a freshwater lake with stingless jellyfish and even a few caves. There are also sheer walls covered in lush soft corals and huge anemones.

Truk “Chuuk”

Visited 1995 & 2002

Truk is located about 600 miles east of Guam, Micronesia. Diving in Truk Lagoon is an adventure you will never forget. WWII wrecks are scattered across 77 square miles. The wrecks are covered with life. There are over 300 varieties of hard and soft corals. On the outer reef you will find mountains of coral that stretch as far as the eye can see and drops off into the abyss. Here it is not unusual to see pelagic sharks. This is also where we do an exciting shark dive.

Cozumel, Mexico

Visited every other year

Cozumel is Sea Hunt Scuba's favorite Caribbean diving destination. It is home to a variety of underwater vistas and a range of locations appropriate to all experience levels, from spur and groove reefs to walls that drop off into great blue depths. Swim throughs and impressive marine life are experiences a diver can enjoy several times a day. Don't forget the cave snorkeling on the mainland. What a trip!

Galapagos Islands

Visited 1996

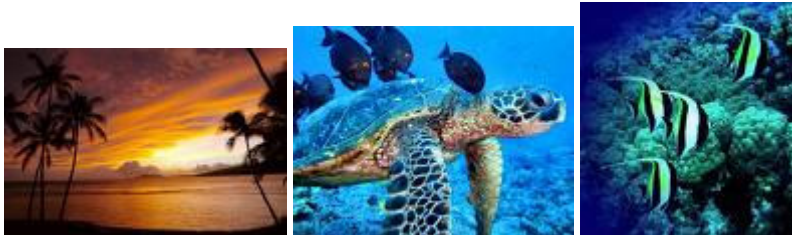

Swept by both the cold waters of Antarctica and warm currents from the tropical Pacific, the underwater world of the Galapagos is as uniquely enchanting as the islands themselves. Here penguins swim with tropical fish and iguana feed underwater. Fur sea lions, hammerhead sharks, turtles and the magnificent mantas are just a fraction of the species that thrive in one of the world's top dive spots.

Grand Cayman

Visited 1997 & 2003

Excellent visibility and calm, warm waters make the Cayman Islands vacation a scuba diving favorite vacation spot. On the Cayman Aggressor IV, Sea Hunt Scuba divers explored the walls and shipwrecks of Grand Cayman, Little Cayman and Cayman Brac.

Kona Hawaiian Islands

Visited 2000

Hawaii's volcanic underwater topography is a diver's wonderland. Lava tubes, bommies, arches and huge craters create a spectacular backdrop for Hawaii's many indigenous species of butterfly fish. Photographers delighted in the many patient subjects like Spanish Dancers, turtles, mantas and frogfish.

Tahiti

Visited 2005

Wow! This was one of the best trips Sea Hunt Scuba has ever done. The atoll islands, in northern Tahiti, made for exciting high-speed drift dives. Hammerhead sharks, mantas, dolphins, sail fish, & very large schools of fish made this trip stand out.

Australia Land & Sea

Visited 2007

Kangaroos, Great Barrier Reef, Aires Rock, Bill Bongs, Sydney, Outback, Kawala Bears, Didgeridoos, Crocks, Rain Forest, and Great People are just some of what we saw. Two weeks of travel bliss.

Fiji

Visited 2007

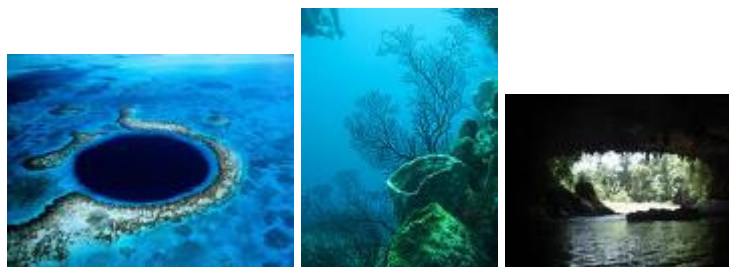

Fiji is a remote group of over three hundred islands in the South Pacific that are characterized by white sands and clear blue seas with lush vegetation on land. Much of Fiji remains unexplored as far as diving is concerned. The coral is colorful with brain corals and fan corals, and the fish life is diverse. Fiji is South Pacific diving at its best.

Socorro

Visited 2009

Located about 250 miles off Cabo San Lucas, Mexico is an island group called Socorro. They are wild, remote and unpredictable and have been called the Mexican Galapagos. This area is famous for up close and personal encounters with the Giant Pacific manta ray, which can grow to 22 feet from wingtip to wingtip. We saw sharks, sharks & more sharks. This was the best big animal trip Sea Hunt Scuba has ever done.

Belize

Visited 2001

Normally twice a year Sea Hunt Scuba goes to out of the country group dive trips. Below are a few other places Sea Hunt Scuba has visited.

Roatan 2008
Bonaire 2005
Grenada 2008
Turks & Cacos 1999
